

September 25

John Falconer

University of Colorado, Boulder
Using Membranes to Separate Molecules by Size

October 2

Peter Rossky

The University of Texas at Austin
*Exciton Migration and Dissociation in
Conjugated Molecular Materials*

October 9

Antonios Mikos

Rice University
*Advancing Scaffold Based Approaches for
Tissue Engineering*

October 16

Benjamin Glasser

Rutgers University
*Rocking and Rolling, Slipping and Sticking:
Wet and Dry Granular Flow*

October 23

Nathan Price

Institute for Systems Biology
*Integrated Mechanistic and Statistical Network
Analysis for Biological and Medical Discovery*

September 16 & 18

Richard H. Wilhelm
Lecture Series

Chaitan Khosla

Stanford University

SEPTEMBER 16

*Your Diet and Your Immune System:
The Example of Celiac Disease*

Location: Friend Center, Convocation Room

Refreshments: 3:30 p.m.

Lecture: 4:00 p.m.

SEPTEMBER 18

Assembly Line Antibiotic Biosynthesis

Location: Friend Center, Convocation Room

Refreshments: 3:30 p.m.

Lecture: 4:00 p.m.

November 13

Christopher Macosko

University of Minnesota
*Controlling Polymer Interfaces with Clay and
Graphene Nanosheets*

November 20

Michael Levitt

Stanford University Medical School
*Combinatorial Methods Solve a Difficult Structural
Problem to Reveal How Chaperonins Work in
Eukaryotes*

December 4

Clayton Radke

University of California, Berkeley
Are Your Eyes Dry? Meet Helen.

December 11

David Case

Rutgers University
*Simulating Biomolecules with 3D-RISM Implicit
Solvent Models*
